Making Hydrogen Happen

Demonstrating a green hydrogen powered future for
Edinburgh's outdoor festivals

David Amos

All Energy – May 2022

| In 2021 PlusZero delivered a number of UK Hydrogen firsts

First Green Hydrogen-powered performances at Edinburgh International Festival

First Green Hydrogen-powered venue at COP26 in Glasgow

First Green Hydrogen-powered event at Edinburgh Castle

First Green Hydrogen delivery for Extreme-E electric SUV racing series

| PlusZero's technology allows customers to decarbonise portable power now

PlusZero's Hydrogen combustion engine technology offers the fastest, most reliable and lowest cost route to decarbonising portable power now

- ⚡ 50kVA unit now
- ⚡ 100kVA & 200kVA battery hybrid units from July 2022
- ⚡ 400kVA battery hybrid units in 2023
- ⚡ Ammonia fuelled engines under development

| How quickly can we scale up ?

| Collaboration & partnership made this happen
